

# Compeat & Digital Dining: Customer Case Study

*Four Foods Group Improves Reporting Efficiencies with Compeat and Digital Dining Integration*

**Four Foods Group** began in 2008 when owners Andrew and Shauna Smith decided to take an immensely popular restaurant in Utah County, **Kneaders Bakery and Cafe**, and grow it well beyond the area. Today Four Foods Group operates 35 of the 43 Kneaders locations currently open. The locations span across 3 states with many more locations in development. Four Foods installed **Compeat Advantage** to manage inventory and accounting for all of its locations in 2014. Four Foods also utilizes **Digital Dining** for their POS system. Four Foods Controller, Richie Stevens, describes their experience with Digital Dining and Compeat.

“ We are able to get *really valuable information* out of *Digital Dining* and into *Compeat*. ”

**You are using two restaurant systems – Digital Dining for POS and Compeat for back office, accounting, and workforce. How is that working out for you?**

**Richie Stevens:** The integration is currently working very well. We are able to get really valuable information out of Digital Dining and into Compeat.

**Are you getting all the information you need from your Digital Dining POS system into Compeat? Are you experiencing reliable communication?**

**RS:** We are doing an excellent job getting any information we need to out of the Digital Dining/Compeat connection. We are able to poll all the relevant information we need for our reporting purposes, based on sales categories, sales tax, stations, etc.

**Is Compeat making it easier for you to audit your Digital Dining POS financial information and post it directly to accounting?**

**RS:** Compeat is making it much easier to audit the Digital Dining POS financial information and post directly to accounting. Especially since we came from Quickbooks where we were using an excel report from each store for the DSR. Having all the DSRs for all the stores in one system and

“ Compeat has greatly improved the timing of our reporting. We now get almost instant sales reports! ”

knowing they are accurately reflecting the numbers in Digital Dining is a great relief.

### **Has Compeat allowed you to increase control over your daily operations?**

**RS:** Compeat has greatly improved the timing of our reporting. Compeat and Digital Dining communicate each day at 6:00 am. This gives me the ability to deliver accurate and reliable sales reports from the previous day first thing in the morning. These reports are extremely useful to the operations team so they can attack problem areas and adjust as needed on the fly.

### **Has Compeat allowed you to save time in your daily restaurant accounting operations?**

**RS:** Compeat has helped immensely in the accounting side of the business. It has saved us a large amount of time with financial reporting.

### **Are there any other benefits you have gained from using Compeat?**

**RS:** We came from a very manual way of reporting our business. Compeat has helped us by giving us almost instant sales reports.

To learn more about Compeat or to find out if we are a good fit for your organization, please call us at (512) 279-0771 or email [info@compeat.com](mailto:info@compeat.com).
