Mission Mgmt Services Fulfills Restaurant Investors' Needs with Compeat Advantage

Mission Management Services provides full-management, consulting and accounting services to the restaurant industry. Mission Management also provides the hiring and leasing of employees to work at each of the restaurants. Mission Management began six years ago with three restaurants and now provides services for seven full-service restaurants and two micro-breweries. In order to provide full management and accounting services for these seven restaurants *and* the micro-brewery distribution center, Mission Management counts on Compeat.

Challenge

Prior to the formation of Mission Management, the team was utilizing a DOS based back office system and Real World accounting. Program integration was nonexistent, which resulted in additional labor hours needed to manually update information from each restaurant. In addition, their out-dated Payroll system could not manage employees on-location at each restaurant. When Mission Management was first formed, they began looking for a fully-integrated, web-based system that would not only fulfill their back office and accounting needs, but also provide them with a Payroll and Commissary solution. Compeat was their answer!

“Compeat is truly unique software that brings your whole operation into one package.”

~ Barry Haven / President
Mission Management Services

Solution

Compeat now provides Mission Management with a complete back office, accounting, payroll, and commissary solution. With Compeat's web-enabled architecture, all information, from inventory receipts at the restaurant to the profit-and-loss statements

Company Overview

Mission Management Services provides full-management, consulting and accounting services to the restaurant industry. With Compeat, they are able to provide their seven full-service restaurants and two micro-breweries with a complete back office, accounting, commissary, and payroll solution.

Business Situation

Needed integration between a DOS based back office system and Real World accounting. They also did not have Payroll software that could manage the employees at each restaurant.

Key Financial Results

Mission Management has a complete back office, accounting, payroll, and commissary solution in Compeat. With the web-enabled architecture, all information from inventory receipt at the restaurant to the profit and loss statement at the company office, is always available, always in balance, and always in one common database.

Case Study ▶ Mission Management Services

at the company office, is always available, always in balance, and always in one common database. "Compeat is truly unique software that brings your whole operation into one package," raves Barry Haven, President of Mission Management Services.

Mission Management employees and stakeholders agree that Compeat eXcellent™ Financial Functions are a favorite. These functions allow Mission Management to customize reports the owners and investors are seeking and provide these reports on a weekly basis. "Once you've built your templates, the time required to generate new reports decreases significantly. We're not reinventing the wheel every time an investor asks for a report. This has made us more efficient and given the owners and investors more insight into the restaurants' financials on a more frequent basis," says Haven.

Results

As an added benefit, Mission Management has also been able to utilize the accounting functions within Compeat Advantage to maintain the real estate financials for the various restaurants. Since the investment groups own the actual property the restaurants are on, but there are separate owners who own the restaurants, they often have different requests and needs. Haven says: "Compeat is able to manage all financial aspects and provide the investors and owners with the financial data they seek."

Mission Management hires all of their employees to work at each of the restaurants they manage and leases them out to the restaurant owners. With Compeat Payroll, they are able to easily track and pay each one of these employees. From polling employee sales and tips, to handling multi-department employees, to printing payroll checks as well as direct deposit – payroll became quite simple with Compeat. Mission Management is also able file one consolidated government report for all of their restaurants, as well as utilize Compeat Greenshades e-filing for their tip incomes and allocated tips.

Mission Management also manages the accounting for **Northern United Brewing Company** and manages their two restaurant operations – **Artisan Ales and Jolly Pumpkin**. These micro-breweries/restaurants count on Compeat Commissary to handle all shipments and sales of their beer worldwide. They also ship product within the company and can easily transmit inventory and prep requisitions to each store. Compeat Commissary also enables them to dig deeper and analyze usage trends and sales history by restaurant.

Going Forward

Mission Management Services is in the process of assuming management of an existing restaurant concept and is also opening a companion deli operation. They plan on utilizing Compeat for both of these operations. "There is no limit to what Compeat can do," according to Haven.

“There is no limit
to what Compeat
can do.”

~ Barry Haven, President
