

ACCOUNTING

INVENTORY

LABOR

Looking for one place to control and manage your prime costs? General ledger not exactly where it should be? Entering duplicate transactions in your inventory? Doing inventory in the freezer with no WiFi? Trying to figure out your most profitable menu item? Employee data everywhere but where you need it? Its 2am and you are worried about compliance with new labor laws?

Meet Advantage.

Compeat Advantage is the only comprehensive back office software with fully integrated Accounting, Inventory and Labor specifically designed for restaurants. Compeat Advantage manages labor costs and ensures you are compliant with all government agencies. It provides total control of prime costs and a perfect audit of restaurant operations through accounts payable, bank reconciliation and financial reporting. It also takes care of all your back office and inventory needs, helping to control F&B costs by comparing actual vs. theoretical costs and usage, down to the recipe...down to the ingredient...down to the penny. Inventory creates Accounting transactions. Accounting drills down to Inventory transactions. Labor feeds into Accounting. They work together like a perfect soufflé- a soufflé that can reduce your costs by 5% or more. You don't want one without the other. It just makes sense. All your data in one common database and seamlessly integrated. Perfection.

Money to your bottom line - that's the Compeat Advantage.
