

General ledger not exactly where it should be? Feeling like you have no control over your bottom line? Entering duplicate transactions in your inventory? Doing inventory in the freezer with no WiFi? Trying to figure out your most profitable menu item?

Meet Advantage.

Compeat Advantage is the only comprehensive back office software with fully integrated Accounting and Inventory specifically designed for restaurants. Compeat Advantage provides total control and a perfect audit of restaurant operations through accounts payable, bank reconciliation and financial reporting. It also takes care of all your back office and inventory needs, helping to control F&B costs by comparing actual vs. theoretical costs and usage, down to the recipe...down to the ingredient...down to the penny. Inventory creates Accounting transactions. Accounting drills down to Inventory transactions. It's like peanut butter and jelly. You don't want one without the other. It just makes sense. All your data in one common database and seamlessly integrated. Perfection.

Learn how our customers have saved 5% on their costs of goods. Money to your bottom line - that's the Compeat Advantage.
