

High Flying Foods Takes Off with Business Intelligence

Web-based solution provides executive and store management daily reports to better manage and make decisions for the overall company.

Ctuit Software (now Compeat), a leader in business intelligence software for restaurants, announced that High Flying Foods, innovative restaurant operators bringing quality, fresh, organic, local food to discerning travelers, launched Compeat RADAR into its 20 locations. The web-based solution provides executive and store management daily reports on how each site is performing to better manage and make decisions for the overall company.

RADAR, integrated with High Flying Foods' Micros POS, gathers critical information on a daily basis for the corporate office. For each location, reports are easily available for management to track and analyze labor, sales, and other financial data. With RADAR, High Flying Foods accessed reports to help manage cash flow with extremely accurate, timely information from its sites. This facilitated decision-making for the company including hiring new positions and purchasing new efficient capital equipment.

"As High Flying Foods started to expand, we needed to focus on details of the company's success in a timely and efficient manner," said Kevin Westly, President, High Flying Foods. "RADAR gives us that knowledge to keep up with sales trends by the hour in each location so we can respond with appropriate strategies to increase sales in a very targeted manner."

"As High Flying Foods started to expand, we needed to focus on details of the company's success in a timely and efficient manner."

COMPANY OVERVIEW

High Flying Foods is a boutique, family-owned and operated company that is defining the next generation of quality driven, hand-crafted, farm-fresh airport dining.

BUSINESS SITUATION

High Flying Foods needed a web-based solution to provide executive and store management daily reports on how each site is performing in order to better manage and make decisions for the overall company.

KEY RESULTS

Compeat RADAR is a complete above-store, BI, Analytical and Financial reporting tool that gives the entire management team deep insight and control to quickly identify trends and operational issues.

"We are excited to have High Flying Foods as one of our customers. As their company continues to grow, Compeat will be able to provide their executive and operational teams with the business intelligence to drive further success," said Rob D'Ambrosia, former President and CEO, Ctuit Software.

Compeat RADAR is a complete above-store, BI, Analytical and Financial reporting tool that gives the entire management team deep insight and control to quickly identify trends and operational issues. Compeat RADAR users make informed, fact-based decisions critical to success.

About High Flying Foods

High Flying Foods is a boutique, family-owned and operated company that is defining the next generation of quality driven, hand-crafted, farm-fresh airport dining. Our authentic approach is both unique and inspired, and we have emerged as a leader in bringing quality, fresh, organic, local food to travelers. Not only are we a family-run, woman-owned business that brings to the table our own locally-acclaimed brand, but we also excel in adapting and responding to each unique airport location. We embrace local chefs and bring their pure culinary vision to life in an airport setting, while maintaining quality, freshness, and service. Nothing is lost in translation.
