

Station Casinos Wins with RADAR

Ctuit Software (now Compeat), the leader in business intelligence software for restaurants, announced that Station Casinos, one of the leading providers of gaming and entertainment in Las Vegas, has implemented Compeat RADAR throughout its 183 restaurant, bar and concession locations. With the web-based above store reporting solution, Station Casinos can now access detailed insight and benchmarking data to better understand the performance for all of its locations.

Station Casinos required a solution to efficiently distribute reports to large groups of employees and management, as well as ensure workers knew how to utilize information generated in the reports for maximum benefit. By implementing Compeat RADAR, the company enabled its staff, including restaurant managers, executives, sous chefs, and property managers, to gain visibility into the performance of their respective business units.

With RADAR, employees access benchmarking reports to compare sales and labor data from similar restaurants at Station Casinos. This information allows management to analyze and compare why one outlet is performing better than another (i.e. running more specials, different contests, “rock star” servers, etc.).

“For managers, RADAR provides easy distribution and access to information, allowing them to take ownership of their business. From the perspective of the executive and operations team, managers are held accountable to the results and goals that need to be achieved.”

- Daniel Spath
Director of Operations Analysis

COMPANY OVERVIEW

Founded in 1976, Station Casinos LLC is the leading provider of gaming and entertainment to the residents of Las Vegas, Nevada.

BUSINESS SITUATION

Station Casinos required a solution to efficiently distribute reports to large groups of employees and management, as well as ensure workers knew how to utilize information generated in the reports for maximum benefit.

KEY RESULTS

Station Casinos required a solution to distribute reports to large groups of employees and management, as well as ensure workers knew how to utilize information generated in the reports for maximum benefit.

"Ctuit (now Compeat) RADAR has had a substantial cultural impact on our food and beverage managers and overall program," commented Daniel Spath, Director of Operations Analysis, Station Casinos. "For managers, RADAR provides easy distribution and access to information, allowing them to take ownership of their business. From the perspective of the executive and operations team, managers are held accountable to the results and goals that need to be achieved."

"RADAR has had a substantial cultural impact on our food and beverage managers and overall program."

- Daniel Spath
Director of Operations Analysis

According to Rob D'Ambrosia, former President and CEO, Ctuit Software, "In the gaming industry, there are complex rules and regulations in how point of sale data is transferred and accessed. We worked closely with Station Casinos to ensure RADAR met their highest expectations and compliance in providing a secure analytical, business tool to drive success in their business."

Compeat RADAR is a complete above store, BI, Analytical and Financial reporting tool that gives the entire management team deep insight and control to quickly identify trends and operational issues. Compeat RADAR users make informed, fact-based decisions critical to success.
