

# COMPEAT KEEPS PIZZERIAS “ROLLING IN THE DOUGH”

**C**ompeat the most comprehensive all-in-one integrated restaurant accounting, back office, workforce and intelligence management software, has a growing trend of pizzerias choosing Compeat software over other restaurant management systems. Some of these pizza restaurants include: **Georgio's Chicago Pizzeria, Blue Moon Pizza, Spot Pizza Grill, Brooklyn Brothers, Connie's Pizza, Grotto Pizza, and DeAngelo's Pizzeria Company.**

**Georgio's Chicago Pizzeria and Pub**, known for their tasty Chicago style deep dish pizza, is ranked one of the “Top 100 Independent Pizzerias in the Nation. Georgio's uses Compeat to poll their Daily Sales Report, track pricing, and to identify exactly where inventory variances are occurring. By using Compeat's invoice scanning feature, they have also been able to cut back on their labor costs and increase efficiencies. “By increasing our labor efficiencies with Compeat, I can keep out of the office and instead be on the restaurant floor with my employees and customers,” says James Coli, General Manager for Georgio's. “We have better insight into our daily operations”, adds Coli.

**Blue Moon Pizza** thrives on their philosophy to ‘Give people an everyday place that still feels special.’ Blue Moon selected Compeat to streamline their operations so they're able to dedicate more time to making their guests feel just that – special. Blue Moon uses Compeat Advantage to control inventory, build recipes, and cost out their menu items. “Compeat gives us everything we need out of a back office software and much more!” says Kelvin Slater, Founder of Blue Moon Pizza.

**Spot Pizza Grill** offers traditional American pub food with a modern-day twist. Ron Mueller, Director of Operations for Spot, could not be more pleased with his Compeat Advantage software. “As a restaurant operator for the past 30 years, Compeat's software is by far the best I have ever used,” exclaims Mueller. “The ease of inventory building and tracking combined with multiple restaurant capabilities has simplified the task of controlling costs and evaluating menu pricing,” says Mueller. “Compeat's reporting tools are a particular asset when evaluating purchasing practices and patterns, as well as when making deals with vendors,” added Mueller.

COMPEAT'S  
**SOFTWARE IS**  
by far  
**THE BEST**  
I'VE **EVER** USED.

## COMPEAT KEEPS PIZZERIAS “ROLLING IN THE DOUGH” (continued)

### **BROOKLYN BROS. PIZZERIA**

Based in Washington state, **Brooklyn Brothers Pizza Parlor** has been making old school, New York style pizza since 2006.

As the brand expanded, they realized that they needed a business intelligence system that was scalable to additional locations. Brooklyn Bros Pizza primarily wanted to concentrate on reducing labor and food costs. They have since implemented Radar’s Inventory, Accounts Payable, General Ledger Sales, Labor Scheduling, and Intraday Polling modules, as well as the Compeat Schedules and On The Fly mobile apps. “Our managers use the On The Fly application on their phones to see where they compare in real-time against the performance metrics that have been set for their shift,” states David Glass, Director of Finance and Technology. “They also have widgets and alerts on their desktop that show red, yellow, or green for how their daily performance compares to the guidelines set as an organization.”

Why have **Georgio’s Chicago Pizzeria, Blue Moon Pizza, Spot Pizza Grill, Brooklyn Brothers Pizza Parlor, Connie’s Pizza, Grotto Pizza, and DeAngelo’s Pizzeria**

**Company** all selected Compeat Advantage? Because Compeat makes controlling and accounting for pizza restaurants as easy as a dough toss! Two words sum up the relationship between Compeat and these popular pizzerias: “**That’s amore!**”
