

# HAMBURGER THEMED RESTAURANTS REPORT COMPEAT SOFTWARE IS “WELL-DONE”

**C**ompeat Restaurant Management Systems offers an end-to-end back office management and accounting system called **Compeat Advantage™**. Compeat Advantage™ has become the system of choice amongst many well known hamburger themed chains including: **Meatheads Burgers and Fries, Larkburger, Burgermaster, Fudpucker's, Ground Pat'i Grille and Bar, Winking Lizard, and Plan B Burger Bar.**

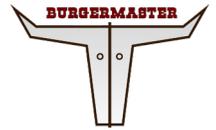

**Meatheads Burgers & Fries** believes strongly that the best meals are simple. Their all-natural burgers are made to order, without any fillers, additives, or scraps, and topped with only the freshest ingredients. While searching for a restaurant management solution in the fall of 2010, Meatheads wanted a system that aligned with their beliefs — simple yet very effective. Compeat was the perfect match. After implementing Compeat in all locations, Meatheads immediately saw benefits. One feature benefit is Compeat's expanded financial reporting via eXcellent Financial Functions™. All managers have access to customized financial reporting, which allows them to isolate issues in a timely manner. “The best part is the simplicity of it all. Anyone who knows how to use Excel can easily create dynamic financial reports,” says Brian Landstrom, Area Director for Meatheads.

**Larkburger** is a fast-casual gourmet burger chain located in Colorado. Compeat gives all Larkburger locations, as well as their corporate office, a completely integrated system. “Everybody is looking at the same reports and speaking the same language,” says Shaughn Larisey, Director of Finance and Controller for Larkburger. Larisey also enjoys how Compeat gives restaurant managers more ownership of their restaurants by putting the power of information in their hands. “We are now able to be more creative and have more valuable conversations about the way our restaurants are run.”

**Burgermaster** has been serving up mouth watering burgers in the Seattle area since 1952, and became a Compeat customer in 2008. The Menu Engineering Report is very useful for their operation. “Knowing which menu items are helping or hurting us gives me the ability to take positive steps to increase our bottom line,” says Bob Jensen, Owner

“Everybody's looking at the same reports and speaking the same language”

of Burgermaster. “For example, an item with low contribution margin but high sales volume may be a candidate for a price increase.”

**Fudpucker's**, dedicated to food, fun and

friends, has been dishing out their world famous seafood and burgers since 1982. Fudpucker's began utilizing Advantage, Payroll, and Commissary in 2005. Kelly Young, Restaurant Operations Manager, relies heavily on the Inventory Count Variance report to quickly identify issues with recipes, plate portions, and waste.

Fudpucker's also finds great benefit from the accounting and payroll features Compeat provides. "No third-party payroll processor has ever lived up to our expectations like Compeat has," states Tracy Hook, Accounting Manager for Fudpucker's.

One of Compeat's original customers, **Ground Pat'i Grille and Bar**, implemented Compeat Advantage™ and Compeat Payroll™ in 2000, eliminating the need for all other software and outsourced services other than POS.

Ground Pat'i raves that processing payroll and tax reporting is now as easy as a flip of a burger patty! "Compeat takes you through the entire process and previewing the built-in checks, prior to any finalized processing and reporting, make it hard to make any mistakes," says Ground Pat'i Accounting and Office Manager Leslie LeBlanc.

"I've never worked with a package so intuitive"

There are many choices when it comes to restaurant management software. So why have **Meatheads Burgers and Fries, Larkburger, Burgermaster, Fudpucker's, Ground Pat'i Grille and Bar, Winking Lizard,** and **Plan B Burger Bar** all chosen Compeat? When asked "Where's the Beef?" for controlling their costs and accounting for results – their answer is Compeat!
